

Ranked #1 in Genetic Color AND Red Thread Resistance!

FIREFLY IS THE LATEST GENERATION OF ADVANCED HARD FESCUE GERMPLASM. IT IS A DARK GREEN, LEAFY, PERSISTENT HARD FESCUE WITH EXCELLENT COLD AND DROUGHT TOLERANCE.

AS WITH MOST FINE FESCUES, IT IS AN EXCELLENT CANDIDATE FOR LOW MAINTENANCE TURFS WHERE LESS FERTILIZER, MOWING FREQUENCY AND IRRIGATION CAN BE AN ISSUE. FIREFLY EVEN RATED TOPS FOR ITS "UN-MOWED" APPEARANCE AS AN ORNAMENTAL GRASS!

WHILE FIREFLY WAS AT THE TOP OF IT'S CLASS FOR SUMMER AND SPRING GREEN-UP, IT ALSO MAKES AN EXCELLENT SHADE GRASS WHICH IS RESISTANT TO RED THREAD, DOLLAR SPOT AND LEAF SPOT. ITS WINTER COLOR IS UNSURPASSED!

FIREFLY IS WELL SUITED FOR MIXING WITH PERENNIAL RYEGRASSES AND BLUE-GRASSES AT IT'S RECOMENDED RATE OF 20-40% OF THE MIX. BECAUSE OF ITS TOP TEN PERFORMRANCE IN THE LATEST N.T.E.P. FIREFLY ALSO QUALIFIES FOR OUR "HIGHER GROUND" PERFORMANCE TAG!

GENETIC COLOR RATINGS
of Hard & Sheep Fescue Cultivators
2004 Data
Ratings 1-9; 9=Dark Green

<i>Name</i>	<i>Mean</i>
FIREFLY (SPM)	6.9
QUATRO	6.5
SCALDIS	6.4
SR 3000	6.1
LSD Value	0.3

TURFGRASS QUALITY RATINGS
of Hard & Sheep Fescue Cultivars
grown at Logan, Utah
2000 Data

<i>Name</i>	<i>Mean</i>
FIREFLY (SPM)	5.7
SCALDIS	5.2
QUATRO	5.0
SR 3000	3.9
LSD Value	2.3

**MOWING HEIGHT 1-3 INCHES
SEEDING RATE- 8-10 LBS/1000 SQ. FT
(300-400 POUNDS /ACRE)
FERTILIZATION: 1-3 LBS NITROGEN PER
YEAR (with Fall fertilization emphasized)**
