

"PROMISES MADE . . . PROMISES KEPT!"

# Promise

## Perennial Ryegrass

This new selection has an unusually dark-green color and a high endophyte count for improved disease resistance. It will produce a lush green turf under various soil types and climate conditions.

Promise performs well under traffic stress and is ideal for parks, athletic fields and home lawns. As a single variety, or in blends, Promise represents the culmination of Perennial Ryegrass breeding to date.
